

## CASTLE SEMPLE ROWING CLUB 2005 REGATTA SAFETY

### Overall Safety

Safety of the overall facility is under the auspices of the Country Park and Watersports Centre and the park rangers' direction must be followed. The park provides rescue facilities on the water.

The safety launch will have the appropriate emergency first aid kit.

Safety of spectators and competitors takes priority over all other activities and launch drivers must especially observe this on the water.

Duncan Walker has been nominated safety officer for the regatta on behalf of the committee and can be contacted via race control.

### Parking

Competitors must follow the direction of the parking marshals.

Trailers are given the priority parking nearest the boathouse and launching facilities. Cars should be moved to or left at the other end of the car park

### Launching

One pontoon is assigned for outgoing boats, the other for incoming boats

Competitors must follow the direction of the pontoon marshals.

Crews must launch in sufficient time to be at the start before the scheduled racing time. This is critical this year given the large entry and races will not be held for late crews

### On the Water

Competitors must follow the direction of the water marshals and regatta officials and the loch circulation pattern must be studied and followed at all times. Crews should prepare for racing beyond the large red buoys at the start of the racecourse and enter racing lanes using these buoys as guides. Coxswains must wear lifejackets.

### Emergencies

The medical officer for the regatta is Cliff Weir.

Race control, commentary, start and finish all carry radios and can assist in summoning help if required. Park staff (based in the visitor centre) will be in attendance to assist in emergencies.

### Emergency Contacts

<b>Police</b>	Quarry Street, Johnstone	01505 321113
<b>Hospital</b>	Royal Alexandra Hospital, Corsebar Road, Paisley	0141 887 9111
